SUPPLEMENTAL DETAILED ACTION

Supplemental Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

Applicants' Representative phoned the Examiner on April 11, 2009, to inform her that some claims, 3, 5, 10, 11 and 14-15 were pending and not included in the restriction requirement. Therefore, this is a supplemental restriction requirement to include those missing claims were inadvertently left out in the first restriction requirement mailed out on May 3, 2009. This requirement for restriction will replace the requirement of May 3, 2009 and includes those missing claims.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-3, 5, 17-20, 24, 27 and 28-29, drawn to a first composition and first method for controlling Candida fungal overgrowth to maintain oral health using the first composition.

Group II, claim(s) 9-11 and 25, drawn to second product which is a food.

Group III, claim(s) 13-15 and 26, drawn to a third product which is a dentrifice.

Group IV, claim(s) 21-23, drawn to a second method of non-persistently colonizing an oral cavity of a subject.

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I is drawn to a composition which is not a dentrifice or food and the method requires controlling *Candida* over growth which is not required of Groups II-IV. Also the second method of non-persistently colonizing an oral cavity is different from the first method in that different process steps are required and the combination does not require a lactate dehydrogenase-deficient strain as required of Group I. Further, the dentrifice requires special features not required of the other groups and hence is defined by the features as a dentrifice. Also a food is not a dentrifice nor is Group I intended to be a food. The methods and compositions are different and distinct from each other and do not have the same special technical features.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed to a nonelected

Art Unit: 1651

process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained.

Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.
